EDUCATION

Communication University of China	<i>2015/09 - 2019/09</i>
B.Eng. Computer Science and Technology	GPA: 3.27/4.00
Computer Operation System, Computer Networks, Data Structures and Algorithms	
The Chinese University of Hong Kong	<i>2019/09 - 2020/11</i>
M.Eng. Computer Science and Engineering	GPA: 3.60/4.0
Data Mining, Big Data Technology, Machine Learning	
The Chinese University of Hong Kong	<i>2021/09 - Now</i>
Ph.D. candidate supervised by Prof Kam-Fai Wong currently	GPA: 3.70/4.0
Dialogue System, Large Language Models, Tool Learning	

PUBLICATIONS

- **Hongru Wang**, Minda Hu, Yang Deng, Rui Wang, Fei Mi, Weichao Wang, Yasheng Wang, Wai-Chung Kwan, Irwin King, Kam-Fai Wong: Large Language Models as Source Planner for Personalized Knowledge-grounded Dialogue, Findings of EMNLP 2023. [Knowledge-grounded DS](#), [LLM](#)

EMPLOYMENT

Research Intern	<i>2022/04 - 2023/03</i>
Huawei, Supervisors: Dr. Fei Mi, Dr. Weichao Wang, Dr. Qun Liu	
Research Assistant	<i>2020/03 - 2021/07</i>
MoE Key Lab of High Confidence Software Technologies, Supervisors: Prof. Kam-Fai Wong	
Research Intern	<i>2019/04 - 2019/07</i>
Kuaishou (The biggest competitor with Tiktok in China), Supervisors: Xiang Wan	

COMPETITIONS & PROJECTS

Research and Development of Human Assist AI to Build Customized Task-oriented Dialogue System with Recommendation	<i>2020/05 - 2021/07</i>
<ul style="list-style-type: none"> • Built a data collection platform to mimic human-to-human dialogue in restaurants; designed corresponding intents and slots in the conversation and set up the interface; post-processed collected dataset such as cleaning, filtering, and correcting typos. • Implemented task-oriented dialogue system based on ConvLab2 platform; designed dialogue flow and templates for natural language generation; conducted experiments based on our new datasets. 	
SMP 2020 ECDT Few-shot Spoken Language Understanding	<i>2020/06 - 2020/08</i>

- Data analysis (intent and slot distribution across different domains); reviewed related work and selected suitable baseline.
- Designed and implemented our approaches with data augmentation, run experiments with weighted sampler according to data distribution, and wrote rules to post-process the output by the model, while leading to our model (96.89% intent F1 and 85.42% slot F1) won third prize.

SemEval 2020 Task 4: CommonSense Detection and Explanation *2019/09 - 2020/05*

- Proposed an effective and interpretable “Explain, Reason and Predict” (ERP) system to solve the three sub-tasks about commonsense and ranked top 10 finally.
- Implemented our approaches; conducted multiple experiments under multi-task setting; wrote the draft of the paper.

Interdisciplinary/Mathematical Contest In Modeling of America *2018/02 - 2018/03*

- Applied raw data correction to establish mathematical model using MATLAB and developed an analog simulation to the existing energy usages.
- Predicted the profile of energy in the next 15, 50, and 100 years; proposed sustainable development strategies

Undergraduate Program for Entrepreneurship *2017/03 - 2018/03*

- Collected questionnaires and requirements to confirm the core function of the program, drew a prototype of the product; designed interaction logic and user interface, and responsible for the division of labor, meeting holding, and problem-solving; addressed some problems about data transmission
- Analyzed feedback from students, teachers and staff; improved functions and published new version of the platform

TEACHING ASSISTANT

SEEM 3450 Engineering Innovation and Entrepreneurship

SEEM 3490 Information Systems Management

SEEM 5730 / ECLT 5910 Information Technology Management

AWARDS AND SCHOLARSHIPS

Third Prize of Internet + College Students Innovation and Entrepreneurship Competition	school
--	--------

China National Radio Scholarship	school
----------------------------------	--------

A software copyright of “WeCampus WeChat mini-program”(2018SR562540)	national
--	----------

Meritorious Winner, Mathematical Contest In Modeling(2018)	international
--	---------------
